SPECIAL
SURGERY

Dear Colleague,

On behalf of the Hospital for Special Surgery, I would like to invite you to the course "News, Advances and Current Concepts of Hip and Knee Reconstructive Surgery" which is going to be held on the 23rd and 24th of January, 2009 in New York, USA.

Hospital for Special Surgery is a world leader, renowned in the diagnosis and treatment of hip and knee pathology. Each year, the hospital's arthroplasty surgeons perform approximately 7000 hip and knee joint replacements.

Orthopaedic specialists offer comprehensive care in all areas of orthopaedics, including sports injuries, hand, foot and spine procedures, as well as arthroscopies and minimally invasive surgeries.

The course has been designed to provide an update and current state in the reconstructive surgery of the adult hip and knee and will also include visits to our services at the Hospital, Biomechanics and Research departments. We hope to give our guests a comprehensive review of the most recent advances in this important subject.

We look forward to welcoming you in New York and to contributing to make your stay in this stimulating city both fruitful and pleasant.

Yours sincerely,

Eduardo A. Salvati, M.D.
Program Director
Clinical Professor of Orthopaedic Surgery
Director Emeritus Hip & Knee Service
