

HSS Histopathology Service | New Project Request

The HSS Research Institute Histopathology Service provides efficient, high-quality, and cost-effective histopathological services to the HSS research community and to outside investigators. Our primary purpose is to facilitate the use of histopathological techniques as reliable research tools for the investigation of autoimmune, inflammatory and orthopedic diseases that fall under the mission and expertise of HSS. **Work is done on a fee-for-service basis** with a graded fee structure. Priority use and reduced fees are given to HSS affiliated investigators. To request core services, please email this form and a service request form (see website) to the HistopathologyService@hss.edu
